

AT110 Accessories

CB110 Fused Power / Ignition Cable

As supplied with the AT110 standard kit, for installation in vehicles, providing hook up of power and ignition.

CB113 'Plug and Play' Cable

Terminated for easy connection of our accessories:

- IB001 iButton probe
- CC001 Contactless CANBus adapter
- BZ001 Buzzer
- CR001 Card Reader

CB111 Test & Development Cable

As supplied with the AT110 Evaluation Kit. This cable is fitted with a DB9/RS232 connector for diagnostics, debugging and configuration etc. (via a PC ascii terminal) in addition to the plug and play terminations for use with accessories, as per our CB113.

CR001 Card Reader

Connects to CB113 plug and play cable to enable driver ID applications using a wide range of RFID/NFC cards (please see the CR001 data sheet for more information).

IB001 iButton Probe with LED Indicator

Panel mount iButton probe in A2 grade stainless steel, with green LED indicator to confirm successful reading of the iButton. Supplied with a 75cm cable, terminated for use with our CB113 plug and play cable (also compatible with plug and play cables for all our other devices).

CC001 CAN-click contactless CANBus adapter

Allows read-only connection to CANBus networks without direct connection to existing vehicle cables. For use in FMS applications. Terminated for use with our CB113 plug and play cable (also compatible with CB243 plug and play cable, for use with our AT240).
